April 23, 2005

Dear Sirs,

Sub : Use of SIGNET ETP for Traction Batteries.

The subject noted product was used on an old battery which was not picking up charge and had become unfit for use. The battery set could be revived with the use of this product and was put in use. The product was used in the month of Feb.'05 and the battery set is still showing the specific gravity 1220 & voltage 100 volt in April i.e. after three months.

The battery condition is considered satisfactory and performance of the battery is being monitored.

Thanking you,

Yours faithfully,

Sunil Mathur
